## foot control

### Left Foot Accelerator 3545S (69750-000)

The left foot accelerator is recommended by driver evaluators for drivers to accelerate using their left foot. It is equipped with a guard to prevent the driver from inadvertently resting their right foot on the accelerator pedal. The left foot accelerator incorporates a quick release mechanism and is easily removable for ambulatory drivers without tools. Your local authorized Mobility Products & Design dealer can install this in your vehicle.

### Accelerator Guard 3570S (69755-000)

The Accelerator Guard is recommended by driver evaluators to be used with hand controls. It protects the driver from inadvertently resting their foot on the accelerator. The quick release mechanism allows the Accelerator Guard to be easily removed without tools, permitting ambulatory drivers full use of the accelerator pedal. Your local authorized Mobility Products & Design dealer can easily install this.

### Accelerator/Brake Guard 3571S (69748-000)

The Accelerator Brake/Guard is recommended by driver evaluators to be used with hand controls. It protects the driver from inadvertently resting their foot on the accelerator or brake pedal. It also shields the driver from unintentionally placing their foot under either pedal. The Accelerator/Brake Guard is sturdy, self-cleaning and features a convenient carrying handle. The quick release mechanism allows it to be easily removed without tools, permitting ambulatory drivers full use of the pedals. Your local authorized Mobility Products & Design dealer can easily install this.
